## **NEWS RELEASE**

### **Aeration Project Planned for Motherwell Reservoir**

Recreational opportunities at Motherwell Reservoir are continuing to be developed as plans for a new aeration system move ahead.

The Motherwell Reservoir Aeration Project is a partnership initiative between the Town of Kindersley, Kindersley Regional Park, Kindersley Wildlife Federation, and the Kindersley Community Walking Trail Committee.

The purpose of the project is to transition the reservoir from its previous role as a back-up water source into a recreational water area that will continue to be developed in years to come for a variety of activities.

Once the aeration system has been installed, the Kindersley Wildlife Federation will be stocking the Motherwell Reservoir with fish (perch) and constructing a fishing dock.

The cost of the preferred aeration system is \$62,000, which will operate on solar power with no need for an additional power source, and can aerate an area of up to 45 acres per unit. Some donations have already been obtained for this project, but more are required.

The Town of Kindersley will continue to provide maintenance of the reservoir with the support of the partnering organizations.

If you would like more information or are interested in contributing to this project, please contact the Town of Kindersley Administration Office at 306-463-2675.
