NEWS RELEASE

Construction of Spray Park Underway

Construction of a family-friendly outdoor spray pad in Baker Park has officially begun this week.

The spray pad is an exciting new feature for Baker Park that will increase use of the park and provide new summer activity for children of all ages. The spray pad will be located on the northwest side of the park, nestled between existing trees.

Dynamic Construction began installing the related 1,600-gallon holding tank today. This will allow for immediate capture of water that can later be repurposed for irrigation within Baker Park or watering flowers and trees throughout Kindersley.

The 13 diverse water park components, which include mist sprinklers, water guns, and other play features, are expected to arrive later this week.

Dynamic Construction's plan was selected from among five proposals submitted earlier this year to construct the spray park. The project is almost \$17,000 under budget, and will cost \$183,023 plus GST. A private donation of \$100,000 and reserve funds of \$50,000 were committed to the project prior to 2014 Budget approval.

Construction of the spray pad is expected to be complete within 3-4 weeks.
