Brain injury in Canada is a silent epidemic. It is the number one killer and disabler of youth, including people under the age of 44. The social, emotional and economical consequences of brain injury are devastating to the survivors themselves, family members, caregivers, support workers and the community at large.

Automobile accidents, sports, injuries, cycling accidents, falls, strokes, tumors, aneurysms, and other non-degenerative conditions are all leading causes of brain injury in Canada.

THEREFORE, the Council of the Town of Kindersley proclaim June as Brain Injury Awareness Month.
